WAPOR Paper Guidelines
(April 2013)

Except where specified otherwise, manuscripts should be prepared in accordance with the Publication Manual of the American Psychological Association (6th ed.) in terms of citation style, references, figures, tables, bias in language and all other elements. Full articles should be a maximum of 30 pages in length including the abstract and all references, tables, figures, appendices, and endnotes. Research notes should generally not comprise more than 3,500 words of text (excluding the abstract and all references, tables, figures, appendices and endnotes) and not more than 2-3 tables or figures and do not contain an abstract when accepted for publication. Notes are refereed and subject to the same standards applied to other articles.

- (1) The title page of the manuscript should provide complete contact information (address, telephone, fax and email) and a brief biographical statement for each author.
- (2) Page 1 of the manuscript must include an abstract (maximum of 120 words) and selected keywords.
- (3) Page 2 starts with title and main text.
- (4) Standard type (12-point font, double-spaced, Times New Roman, 1.0 inch margins) should be used throughout.
- (5) Running head and page numbers on top left corner (header) of each page.
- (6) Footnotes should be avoided or at least kept to a minimum, containing relevant information that cannot otherwise be accommodated in the manuscript.
- (7) References are double-spaced and start on a new page.
- (8) All tables, figures, appendices and footnotes should be placed after references.

Manuscripts that do not follow these requirements will be returned to the author(s).
