LEARNINGS

■ LOW LEVEL OF IMPROVEMENT IN GENDER EQUALITY

The WIN annual survey **shows low level of improvements in gender equality**. Although the increase of positive perception in gender equality achievement in different environments, there is a long way to go, specially in politics and at work.

■ RESULTS ARE UNFORTUNATELY STABLE

Compared to previous years, **there is little or no improvement in terms of violence suffered by women**: results are unfortunately stable

■ CAMPAIGNS FAILED

Despite efforts and campaigns worldwide, results show **little improvement in sexual harassment rates**. In relation to other regions, women in the Americas report the highest levels of incidence.

■ BEST PRACTICES FROM SOME COUNTRIES

Data varies within countries and regions, once we are aware about how different results can be achieved when different efforts are put in place, it becomes clear **how to understand best practices and adapt them to help improving results and help women worldwide**.
