

How do Ukrainians feel amidst the Russian invasion?

Between March 3-4, 2022 Opinion Research Business (ORB) International undertook one wave of **nationally representative** surveys (n=1,024)¹ using Computer Assisted Telephone Interviewing (CATI) in Ukraine to understand public attitudes towards recent political developments, including the invasion of Russian forces. Here are the results:

On a Peace Deal

The Ukrainian public is not pushing for a peace deal. We asked about several hypothetical deals in the survey, each of which would have Ukraine make a concession in exchange for Russia ending the war immediately. No more than one-third of Ukrainians supported any of the deals. Accepting a ban on entering NATO received the most support, with about 30%. But deals that involved officially recognizing Russian control of either Ukraine or the eastern provinces received less than 20% support.

Table 1: Peace Deal Option 1

If it guaranteed an immediate end to the war which of the following scenarios, if any, would you be willing to accept, even if reluctantly: officially recognizing Crimea as a part of Russia	Response	Percentage
	Yes, I would be willing to accept	17.2%
	No, I would not be willing to accept	75.4%
	Difficult to answer/Refuse	7.4%

	Yes, I would be willing to accept	14.7%
	No, I would not be willing to accept	78.6%

	No, I would not be willing to accept	46.1%
	Difficult to answer/Refuse	30.9%

Willingness to Fight

Ukrainians are still motivated to fight. Approximately two-thirds of respondents said they are either strongly or somewhat willing to personally take up arms against the Russian military. Men are slightly more willing than women to fight.

¹ Male = 45.2%, Female = 54.8%. The Autonomous Republic of Crimea and the city of Sevastopol were excluded from the study. In addition, data was collected only in the territories controlled by Ukraine in the Donetsk and Luhansk oblasts.
