

# Public Opinion Research in a Technology-Driven World

WAPOR 76th Annual Conference

19-22 September 2023 – Paris Lodron University of Salzburg, Austria

## CONFERENCE VENUE

Paris Lodron University Salzburg PLUS is the largest educational institution in Salzburg with almost 18,000 students and around 3,000 employees in research, teaching and administration. The University is an integral part of both cultural and economic life, and is a meeting point for teachers and students, academia and the local community. The name of our university reflects its founding by Prince Archbishop Paris Lodron in 1622. Since its re-establishment in 1962, the University of Salzburg has become a modern and vibrant university.

Many of the University's facilities are housed in some architecturally breath-taking buildings in Salzburg's city centre. The Faculties in Freisaal and UNIPARK in Nonntal make up the modern university campus. Further locations include those in Itzling and Rif, as well as further afield in Linz, Krems and Vienna. The University of Salzburg offers a wide spectrum of educational opportunities. The PLUS boasts 87 degree programmes. They are divided into Bachelor's, Master's, PhD and diploma programmes. Students are free to choose their own focus areas and can add supplementary courses in various disciplines. In addition, the University of Salzburg offers numerous part-time University Programmes for Further Education, some of which are run together with other educational institutions.

The University of Salzburg has made great achievements in both basic and applied research, as seen in the increasing number of publications and third-party funded projects. Research is carried out in the University's departments, focus areas and special institutions, as well as in the Christian Doppler Laboratory. Research-based teaching is one of the trademarks of the University, allowing students to be taught by researchers to support the next generation of scientists and scholars. Students can make the most of these engaging, scientifically anchored study opportunities which equips them with the professional competence and the best preparation needed for their future careers.

The PLUS aims to provide its academics with excellent research conditions and international visibility through appropriate resources along with both internal and external networking. The University strives to provide its staff with ample opportunities to gain further qualifications and to get involved in the University's development within its transparent change management processes. As the most important educational and research institution in the city and state of Salzburg, the University should continue to be both locally anchored and still meet the demands of internationalisation. Finally, the PLUS wants to take on urgent regional and global challenges in society, the economy and culture.

## AT-A-GLANCE

### Monday, September 18 – Arrival, Pre-registration

16:00-18:00 *Registration desk is open*

### Tuesday, September 19 – Day 1

08:00-09:00 *Registration desk is open*

09:00-12:00 Training workshops: morning session

09:00-12:00 Council meeting (by invitation only)

12:00-13:00 *Coffee break*

12:00-13:00 *Registration desk is open*

13:00-16:00 Training workshops: afternoon session

13:00-15:00 WAPOR and regional chapters meeting (by invitation only)

16:00-17:00 *Registration desk is open*

17:00-19:00 Conference opening: keynote lecture 1 and art contribution-live survey experiment

19:00-21:30 Welcome Reception

### Wednesday, September 20 – Day 2

08:00-16:00 *Registration desk is open*

09:00-10:15 Keynote lecture 2

10:15-10:45 *Coffee break*

10:45-12:15 Featured panels I

12:15-13:00 *Lunch break*

13:00-14:30 Parallel sessions I

14:30-15:00 *Coffee break*

15:00-16:30 Parallel sessions II

16:30-17:30 Meeting of National Representatives

16:30-17:30 Posters presentations

17:00-18:00 *River boat tour (optional)*

18:00-19:30 *Walking city tour (optional)*

20:00-22:00 *Joint dinner (optional)*

### Thursday, September 21 – Day 3

08:00-16:00 *Registration desk is open*

09:00-10:30 Featured panels II

10:30-11:00 *Coffee break*

11:00-12:30 Parallel sessions III

12:30-13:15 *Lunch break*

13:15-14:45 Parallel sessions IV

14:45-15:00 *Coffee break*

15:00-16:30 Parallel sessions V

17:00-18:00 *River boat tour (optional)*

17:00-18:30 *Walking city tour (optional)*

19:00-22:00 Awards banquet

**Friday, September 22 – Day 4**

- 08:00-15:00 *Registration desk is open*
- 09:00-10:30 *Featured panels III*
- 10:30-11:00 *Coffee break*
- 11:00-12:30 *Parallel sessions VI*
- 12:30-13:15 *Lunch break*
- 13:15-14:45 *Parallel sessions VII*
- 14:45-15:15 *Coffee break*
- 15:15-16:45 *Parallel sessions VIII*
- 17:00-18:15 *Closing session, keynote lecture 3*
- 18:15-19:45 *WAPOR Business Meeting*

**Saturday, September 23 – Excursions, Departure**

- 10:00-14:00 *Sound of Music Tour (optional)*
- 10:00-14:00 *Eagle's Nest Tour (optional)*
- 10:00-14:00 *Lakes and Mountains Tour (optional)*

**TUESDAY, SEPTEMBER 19 – DAY 1 (TRAINING WORKSHOPS)**

Time	Room	Activities
08:00-09:00	Gallery 1. OG	Registration desk is open
09:00-12:00	SR1.006/ 1.007	<b>Workshop 1: Fundamentals and Best Practices of Administrative Records for Survey Methodology</b> – by Asaph Young Chun (Seoul National University, South Korea)
	SR1.008/ 1.009	<b>Workshop 2: Survey Quality Predictor 3.0 – A Tool for Quantifying the Quality of Survey Questions</b> by Lydia Repke (GESIS - Leibniz-Institute for the Social Sciences, Germany)
	SR 1.004	<b>Workshop 3: Measurement Invariance in Comparative Social Research</b> - by Heinz Leitgöb (Leipzig University, Germany)
09:00-12:00	SR1.003	<b>WAPOR Council meeting</b> (by invitation only)
12:00-13:00	Foyer Library 1.UG	Coffee break / Registration desk is open
13:00-16:00	SR1.006/ 1.007	<b>Workshop 4: Cross-cultural survey methodology – the benefits and pitfalls of multilevel-analysis</b> by Wolfgang Aschauer (Paris Lodron University of Salzburg, Austria)
	SR 1.004	<b>Workshop 5: Assessment of Survey Data Quality</b> by Dimitri Prandner (Johannes Kepler University of Linz, Austria), Alexander Seymer (Paris Lodron University of Salzburg, Austria)
	SR1.008/ 1.009	<b>Workshop 6: Factorial survey experiments for the study of opinions and intentions – potentials, pitfalls, evaluation</b> by Knut Petzold (Zittau Goerlitz University of Applied Sciences, Germany)
13:00-15:00	SR1.003	<b>WAPOR and regional chapters meeting</b> (by invitation only)
16:00-17:00	Gallery 1. OG	Registration desk is open
17:00-17:30		<b>CONFERENCE OPENING: WELCOME</b> <u>Chair:</u> Wolfgang Aschauer (Paris Lodron University of Salzburg, Austria) Robert Chung (Public Opinion Research Institute, Hong Kong) Holli Semetko (Emory University, USA) Timothy Johnson (University of Chicago, USA)
17:30-18:30	E.001 U1.001 (HS Thomas Bernhard)	<b>PLENARY SESSION: KEYNOTE LECTURE</b> <u>Chair:</u> Holli Semetko (Emory University, USA)  <b>Artificial opinions? AI, politics, and public opinion</b> Claes de Vreese (University of Amsterdam, the Netherlands)
18:30-19:00		<b>Statistics on Stage</b> Art contribution - live survey experiment by Daniel Wetzel and Rimini Protokoll
19:00-21:30	Rooftop terrace	Welcome Reception (included in conference registration)

### Cross-cultural survey methodology – the benefits and pitfalls of multilevel-analysis

The course consists of two teaching units and one practical session and will give an introduction into the main challenges of cross-cultural survey methodology, and one commonly used statistical technique (multi-level analysis) for cross-national comparisons. In an introductory session I will deal with the specific challenges of cross-national survey research at different stages. We will refer to various levels of bias and will discuss certain guidelines to improve cross-cultural research. In the second session I will give an introduction to multilevel analysis and will discuss the potentials and limits of this method for cross-cultural research. We will also deal with one practical example (conducting a multilevel analysis with SPSS) to demonstrate how results can be obtained, illustrated, and interpreted with caution. The course represents a mixture of introducing the main issues of (cross-cultural) survey design and offering first insights and a critical understanding in multilevel analysis, which is a commonly used technique in cross-cultural survey research. The course aims at students and scholars from all disciplines and at all academic levels (Master students, Ph.D. students, post-doctoral researchers and academic staff). Basic knowledge in survey research and statistical techniques (such as regression analysis) is not required but is considered as useful to get the most out of the course.

**Lecturer:** Wolfgang Aschauer is currently working as Associate Professor at the Division of Sociology and Social Geography (Department of Sociology) at the University of Salzburg. His main research focus is on the contemporary challenges of social integration in Western societies. In his studies, he mainly adopts a quantitative perspective and is involved in several methodological sociological networks, including the International Sociological Association Research Committee 33 (ISA RC33), the European Survey Research Association (ESRA), and the European

Sociological Association Research Network 21 (ESA RN 21) and WAPOR (World Association of Public Opinion Research). Parts of his work are committed to the development of quantitative methods, specifically evidencing his cross-cultural expertise in the role of construct equivalence.

### Factorial survey experiments for the study of opinions and intentions – potentials, pitfalls, evaluation

Factorial survey experiments (FSE) are increasingly used to study attitudes, opinions and intentions in survey-based research. The method allows for a direct empirical test of theoretical explanations, causal inference of treatment effects, and the investigation of potential effect heterogeneity across (sub)samples, while designs can be easily replicated. Therefore, FSE can serve as an enriching complement to conventional surveys on the one hand and to field experiments on the other. However, it is also important to be aware of the shortcomings of applications. In the training workshop, we aim to discuss the potentials and pitfalls of FSE-applications. For this purpose, the methodological core idea, basic construction principles and fields of application are discussed in a first step. Following on from that and using an example experiment, the possibilities and limits of FSE are outlined in relation to the internal validity, construct validity, and external validity of the obtained results. Potential threats to validity are illustrated for all essential study particulars: varied dimensions and levels, respondent sample, randomisation, survey mode, and data analyses. By this way, some general guidelines for using FSE in survey-based opinion research are provided. Finally, we will practically train to build up an experimental design using own example questions and to critically interpret results of an example analysis. The workshop is designed as an introductory course for interested researchers of all academic levels who want to get an overview of the method or who plan to use FSE in their own research. Basic knowledge of survey designs, practical data analysis and issues of causal inference is an advantage.

**Lecturer:** Knut Petzold is currently working as a Professor of Methods of Empirical Social Research at Zittau/Goerlitz University of Applied Sciences and as a Visiting Professor at the Department of Sociology and Human Geography of the Paris Lodron University Salzburg. His expertise lies in the application of experimental designs the social sciences, while he is generally interested in theory-driven approaches and contemporary methods of causal inference. He holds a doctoral degree from the University of Leipzig and received a postdoctoral graduation from

the Catholic University of Eichstätt-Ingolstadt. He also takes active roles in the European Sociological Association (ESA RN 21), the European Survey Research Association (ESRA), and the German Sociological Association (DGS).

## Survey Quality Predictor 3.0 – A Tool for Quantifying the Quality of Survey Questions

The Survey Quality Predictor (SQP) is an open-access software for predicting the quality of survey questions. It is also a database and search engine for survey questions and information on their quality. SQP has three main areas of application: (1) questionnaire development (i.e., SQP can be used to design, evaluate, and improve new questions), (2) translation checks (i.e., SQP can be used to control for deviations in translations in cross-country or multilingual studies), and (3) correction of measurement error (i.e., the quality estimates of SQP can be used to correct for measurement error in substantive analyses). In the first part of the workshop, how the quality of survey questions can be predicted, how this is implemented in SQP, and how SQP can be applied in the research process are explained. The second part of the workshop will be more hands-on, and participants will get to know the software in more detail.

**Lecturer:** Lydia Repke studied *Political and Administrative Sciences* at the University of Konstanz, Germany, and did a research stay at Boğaziçi Üniversitesi in Istanbul, Turkey. She graduated from the double master's degree program *European Master in Government* of the University of Konstanz and Universitat Pompeu Fabra, Spain, where she received her doctor's degree in cultural psychology (2017) and the Special Doctorate Award 2017 for her doctoral thesis. Since 2012 she has been a member of the Research and Expertise Centre for Survey Methodology in Barcelona, Spain, and since 2018 she has been working for GESIS – Leibniz Institute

for the Social Sciences in the Department of Survey Design and Methodology in Mannheim, Germany, and is the manager of the Survey Quality Predictor 3.0. From 2018 to 2021, Lydia Repke served as spokesperson for the Leibniz PostDoc Network. In 2020, she was accepted into the Young Academy of the Academy of Sciences and Literature, Mainz and was part of the speaker team from 2022 to 2023. In October 2022, she was elected to the board of the "Sociological Network Research" Section of the German Sociological Association (German: *Deutsche Gesellschaft für Soziologie, DGS*).

## Measurement Invariance in Comparative Social Research

Comparing the evolution and constitution of social phenomena across social contexts, groups or time has a long tradition in social science research. It allows to study, how the contextual or temporal conditions affect the individuals exposed to these conditions and social life as a whole. Often, the theoretical constructs subject to comparisons are not directly observable (e.g., value orientations, attitudes, beliefs, motivations). Rather, they are conceptualized as latent constructs, measured by a set of observed indicators.

Valid comparisons of latent constructs require construct equivalence *and* equivalent measurements. In this workshop, we first discuss these concepts and their connection from an epistemological perspective. Then, we focus on measurement invariance as a framework for conceptualizing measurement equivalence. We deal with the consequences of noninvariance for comparisons and how measurement invariance can be empirically assessed by means of confirmatory factor analysis. The workshop ends with a brief description of existing analytical options if exact measurement invariance cannot be obtained. Please note that practical statistical software applications for participants are not provided due to time constraints.

The workshop is designed as a *first introduction* for students/researchers who (intend to) work with survey data; *start* doing comparative research; are interested in comparing latent constructs and their associations. Participants are assumed to be familiar with the linear regression model and to have at least basic knowledge in confirmatory factor analysis and structural equation modelling. Participants do not need prior knowledge about the methodology of comparisons.

**Lecturer:** Heinz Leitgöb is an Interim Professor at the Institute of Sociology, Leipzig University, Germany and senior researcher at the Institute of Sociology, University of Frankfurt, Germany. He chairs the methods section of the German Sociological Association and the European Working Group on Quantitative Methods in Criminology of the European Society of Criminology. He is also an editor of the European Association of Methodology Book Series at Routledge. His research interests cover the topics of measurement invariance, survey mode effects,

digitalization of social research methods, and criminal behaviour.

### Assessment of Survey Data Quality

Assessing the quality of survey data is crucial for ensuring accurate and reliable research findings. This workshop aims to provide participants with a comprehensive understanding of survey biases, their indicators, and strategies to identify and mitigate them. Additionally, the workshop will delve into essential concepts such as response styles, the design effect, and the distinction between non-probability and probability samples.

The workshop will begin by introducing participants to the fundamental concepts of survey biases. Biases can arise due to various factors, such as sampling errors, non-response, question wording, and respondent characteristics. By understanding these biases, researchers can enhance the validity and generalizability of their survey results.

The first significant aspect to be covered in this workshop is the identification of survey quality indicators. Participants will learn about common indicators and gain practical knowledge and tools to detect biases in survey data, enabling them to evaluate the quality of their data accurately.

This will be followed up by a discussion of survey design effects on data quality. The design effect accounts for the complex survey designs and clustering effects, which can lead to higher sampling variances. Participants will gain insights into calculating the design effect and its implications for statistical analyses.

Afterwards the final part of the workshop will cover response styles. Participants will explore different response styles, including acquiescence, extreme response, and midpoint tendency. Understanding response styles is crucial for discerning if respondents are answering questions honestly or exhibiting systematic response patterns. Participants will learn techniques to identify and control for these response styles, thus minimizing their impact on reported survey results and interpretations.

During the whole workshop participants will get information on how to deal with such aspects when using non-probability and probability samples. This central theme of the workshop will allow participants to explore the strengths and limitations of each sampling approach and understand how it influences the generalizability and representativeness of survey findings.

By the end of this workshop, participants will possess a solid foundation in survey data quality assessment. They will have the knowledge and skills necessary to identify and mitigate biases, understand response styles, calculate the design effect, and make informed decisions regarding sampling strategies. This workshop aims to equip researchers with the tools they need to ensure the reliability and validity of their survey research. Practical examples and case studies will be utilized to illustrate the implications of sample design choices on survey data quality.

Basic knowledge of R (accessing datasets, generating tables, recoding variables) and basic knowledge of the Total Survey Error framework is required.

**Lecturer:** Dimitri Prandner's current research agenda deals with the quality of survey data (e.g. total survey error; especially interviewer effects as well as application scenarios for data imputation) and how process-generated data ("big data") relates to traditional survey data. This research is conducted in a joint-partnership of AUSSDA – the Austrian Social Science Data Archive and the department of sociology at the Johannes Kepler University of Linz. When it comes to substantive topics, Dimitri Prandner works at the intersection of political sociology (especially political efficacy and political attitudes) and journalism studies, using an approach that builds upon Bourdieu's field theory as well as models based on Durkheim's writings. His teaching is specialized on social science research methods and statistics for social scientist. He was awarded with the 2020 ARS DOCENDI – the Austrian national price for higher education teaching – for research-oriented teaching. Currently he is the speaker for the sociological research designs and methods section of the Austrian Sociological Association.

**Lecturer:** Alexander Seymer teaches statistics and research methods at the University of Salzburg and the Paracelsus Medical University Salzburg. His research interests include the association of personal values and public opinion primarily but not exclusively in the context of welfare states, statistics with a focus on latent variable modelling and everything related to R. Besides his attention to quantitative comparative social science research, his genuine and general interest in statistics

led to collaborations with scholars from other disciplines during the last years. He received his Diploma in Sociology from the University of Leipzig and continued his studies in the International Master programme in Social Policy Analysis by Catholic University Leuven, Luxembourg and Associate Institutes. After studying seven years at universities and research institutes, he decided to apply his knowledge in the context of politics working three years in Brussels. Two of the three years, he dedicated his efforts as assistant to a Member of the European Parliament. Eager to integrate his work and academic experiences, he started his PhD at the Salzburg Centre for European Union Studies at the University of Salzburg. He is currently working at the Department of Political Science and Sociology.

## Fundamentals and Best Practices of Administrative Records for Survey Methodology

Administrative records have long been regarded as a way of supplementing and improving the quality and interpretability of surveys and censuses. Using administrative records helps control the rising cost of survey data collection and improve data quality. This workshop will present fundamental issues of understanding administrative data and integrating them with sample surveys and censuses to provide information essential to decision-making. The workshop will turn to present best practices and cutting-edge research on the use of administrative records over the survey life cycle, integrating with surveys, censuses, and auxiliary data. Real-world examples, as assembled across the Atlantic and the Pacific, of linking administrative records to household, economic and health surveys will address how administrative data can be used to improve the survey frame, reduce nonresponse errors, and assess coverage error, among others.

The workshop is intended to provide a review of foundation and the current state of the field in administrative records research and applications by leveraging a framework of “total administrative records error” and “total linked data error”. As such, the workshop will provide an overview and assessment of methodological issues involved in the collection and analysis of administrative records, such as data quality, cost, and data linking methodology. The workshop will illustrate how administrative data can be transformed into information that is useful and relevant to evidence-based decision making in key sectors of health, economy, and education so they may answer questions that cannot be answered by relying on traditional surveys alone.

The target audience ranges from users and producers of administrative records to researchers in academia, government, and industry. The workshop will be equally useful to students of data science, big data, and survey methodology. The workshop should be of interest and benefit to practitioners of survey methodology, given the escalating use of administrative records in almost every discipline. I will use “Administrative Records for Survey Methodology” (2021, Chun et al.) as a primary reference for the Workshop. The book featuring leading scholars of administrative data across the Atlantic addresses the following topics: theory and fundamentals of administrative data research and application, quality of administrative data, administrative data processing and linking methodology, statistical use of administrative data in sample surveys and censuses, and real-world applications of administrative data to inform evidence-based policy making.

**Lecturer:** Dr. Asaph Young Chun is a seasoned research director, interdisciplinary research scientist, and survey methodologist dedicated to data innovation, survey methodology, and data science over 30 years. Young led a number of governmental and academic institutions by taking various research positions, including Director-General of the Statistics Research Institute, a state-run data think tank of the Korean government; Research Chief for Decennial Directorate at the U.S. Census Bureau; Senior Survey Methodologist at NORC at the University of

Chicago; and Senior Research Scientist at the American Institutes for Research. His areas of research are devoted to administrative records, responsive and adaptive design, nonresponse, and evidence-based decision making. He is currently leading interdisciplinary research for future pandemics at the Seoul National University, South Korea, and providing expert consultations to governments, survey institutions, and academic organizations across the world.

WEDNESDAY, SEPTEMBER 20, 2023 – DAY 2

Sept 20	Room	Sessions
08:00-16:00	Gallery 1. OG	Registration desk is open
09:00-10:15	E.001 U1.001 (HS Thomas Bernhard)	<p><b>PLENARY SESSION: KEYNOTE LECTURE</b>  <b>Chair:</b> Timothy Johnson (<i>University of Chicago, USA</i>)</p> <p><b>Leveraging AI for Survey Research</b>  Frauke Kreuter (<i>Ludwig Maximilian University of Munich, Germany</i>)</p>
10:15-10:45	Foyer Library 1.UG	Coffee break
10:45-12:15	E.001 U1.001 (HS Thomas Bernhard)	<p><b>THE INTERNATIONAL SOCIAL SURVEY PROGRAMME (ISSP):  METHODODOLOGICAL CHALLENGES IN A GLOBAL PERSPECTIVE</b>  <b>Chair:</b> Elvira Scholz (<i>GESIS - Leibniz-Institute for the Social Sciences, Germany</i>)</p> <p><b>Combining Text Messages (SMS) and Telephone Interviews to  Collect Data for ISSP in Greece</b>  Ioannis Andreadis (<i>ELKE A.P.TH., Greece</i>)</p> <p><b>Introducing Web-Based Surveys in the ISSP Comparing Coverage  and Non-Response in Online and Paper Data Collection</b>  Stephanie Steinmetz (<i>University of Lausanne, Switzerland</i>), Annika Lindholm (<i>FORS, Switzerland</i>), Marlene Sapin (<i>FORS, Switzerland</i>)</p> <p><b>The Austrian ISSP Surveys During the Corona Crisis</b>  Hadler Markus (<i>University of Graz, Austria</i>), Anja Eder (<i>University of Graz, Austria</i>), Matthias Penker (<i>University of Graz, Austria</i>), Beate Klosch (<i>University of Graz, Austria</i>)</p> <p><b>The Measurement of Precarious Work and Market Conditions:  Insights from the COVID-19 Disruption on Sample Selection</b>  Sigal Alon (<i>Tel Aviv university, Israel</i>)</p> <p><b>What is Your Income and Who Lives in Your Household? Research  Evidence from the German ISSP 2019-2023 on the Measurement of  Income and Household Composition</b>  Dörte Naber (<i>GESIS - Leibniz-Institute for the Social Sciences, Germany</i>), Elvira Scholz (<i>GESIS - Leibniz-Institute for the Social Sciences, Germany</i>)</p>
10:45-12:15	E.002 U1.002 (HS Agnes Muthspiel)	<p><b>SURVEY RESEARCH IN AUSTRIA: AN OVERVIEW OF ESTABLISHED  PROJECTS AND CURRENT INITIATIVES</b>  <b>Chair:</b> Wolfgang Aschauer (<i>Paris Lodron University of Salzburg</i>)</p> <p><b>The European Social Survey - Conditions and Future Changes</b>  Peter Grand (<i>Institute for Advanced Studies Vienna, Austria</i>)</p> <p><b>The Austrian Socio-Economic Panel (ASEP) - Challenges and  Potentials</b>  Johann Bacher (<i>University of Linz, Austria</i>), Georg Kanitsar (<i>Institute for Advanced Studies Vienna, Austria</i>), Patrick Lazarevic (<i>Statistics Austria</i>), Monika Muhlbock (<i>Institute for Advanced Studies Vienna, Austria</i>), Marc Plate (<i>Statistics Austria</i>)</p> <p><b>Going Online! **SATURDAY, SEPTEMBER 23, 2023 – DEPARTURE, EXCURSIONS**

**Sound of Music TOUR**

Follow the traces of the Trapp family and take a tour through Salzburg and its surroundings. See the original film settings and just imagine being Julie Andrews, the main character in the film, playing Maria von Trapp. Learn about the historical and architectural landmarks of Salzburg as well as the Lake District while enjoying the highlights of the movie. Relax and listen to the *Original Sound of Music* soundtrack and of course feel free to sing-along *Edelweiss* and many more...

4-hour tour with film locations stops at Schloss Leopoldskron & Hellbrunn Gazebo and Wedding Chapel at Mondsee

**Eagle's Nest TOUR**

Passing the old baroque city of Salzburg and crossing the German border, the tour takes you straight into the Alps to our first stop the Obersalzberg. Reserved special busses – fitted with special engines and brakes – will take you on a most spectacular 6.5 km long single lane road blasted out of solid rock with a 22% gradient up to the **Eagle's Nest, 1.820** meters. To reach Hitler's former residence you enter a 124 meters long tunnel into the mountain where a golden brass elevator will take you another 124 meters up into the building itself. Construction of the Eagle's Nest with its metre-thick foundation walls was finished after only 13 months in 1938 and considered as one of the most elaborate construction projects during the Third Reich. After touring the historical building including the famous fire place room, enjoy a breathtaking panoramic view of the Bavarian and Austrian Alps. Yet, as impressive the building may be, it still stands for the insanity of regime where plans for war and mass murder were formed.

**Lakes and Mountains TOUR**

Join us on our trip to the romantic **Lake District Salzkammergut**, where Salzburgs Prince Archbishops held royal hunts and the Austrian Emperor Franz Joseph and his family spent their summer vacations. The tour will leave Salzburg and pass by **Lake Fuschl** with castle Fuschl, now a five-star hotel, on its shores. Explore the little town of **St. Gilgen**, where Mozart's mother was born and enjoy a **45-minute boat ride to St. Wolfgang**. At **St. Wolfgang** your guide will show you the **famous pilgrimage church** with its carved gothic winged altar by Michael Pacher. There will be some time to explore the picturesque town or have a coffee break on the terrace of the famous White Horse Inn (Weisses Rössl) – We continue our journey along the Krotensee with castle Hüttenstein and drive along Lake Mondsee before we return to Salzburg.
