

WAPOR 2024

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference

28^{SUN.} - 31^{WED.} July 2024

Sungkyunkwan University, Seoul, Republic of Korea

WELCOME TO THE WAPOR COMMUNITY

Dear Members and Friends,

This is my second but also the last time to greet all of you in this way as WAPOR President. I feel so immensely honored to be able to contribute to the growth of the WAPOR Community in such a way. I am especially delighted to see the materialization of the first Joint WAPOR Global-Regional Conference ever – not a back-to-back event, but a truly joint conference with one uniform conference registration fee riding on different membership systems, total integration of conference programs, full sharing of local and global sponsorships, and most important of all, one single team of organizers fully supported by our global and regional leaderships. This would not have been possible without complete trust among all organizers. I thank all colleagues involved for making this possible!

As our President of WAPOR Asia Pacific (WAP) Linda Luz Guerrero writes in her welcome remarks, WAP held its first Annual Conference in 2018, and it was still called “WAPOR Asia” then. I was so fortunate to be the Founding President of the Chapter, and I feel so gratified to see the Chapter grows, under the leadership of Yashwant Deshmukh, Jibum Kim, and now Linda. It is no mere coincidence that we now venture into a new era of Global-Regional relationship, and having this Joint Conference is just one of the many developments.

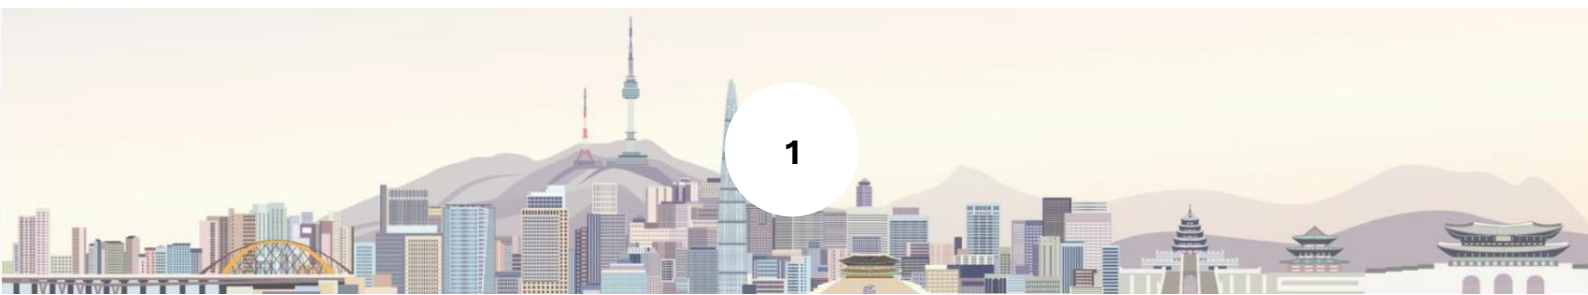

In our recent membership survey on “WAPOR 2030 Agenda” conducted as a preparation for this year's Pre-conference Policy Forum held in early July, there were diverse views on the future development of Regional Chapters. At one end there was a call for one single WAPOR without any Chapter, while at the other end, there were suggestions that WAPOR should establish a European Chapter, and possibly also a North American Chapter. These are important ideas which will have to be handled by our future leaders. At this juncture, let me stress that WAPOR chaptership is not meant to divide the world neatly into geographic regions. It is meant to promote studies in different regions and cultural clusters around the world which may overlap with each other. Membership of different chapters is not mutually exclusive.

While this can be one important move to break down barriers, there are also other means. Starting last year, we have implemented AI (artificial intelligent) translation to our website, and all text messages can now be automatically translated into more than 130 world languages by a simple click. Then we launched our Friends of WAPOR Network, and in 2024, we introduced organizational membership. We have also established a Global Development Fund to streamline our donation effort, and hopefully we will be able to support a lot more regional projects and initiatives with this GDF. While we will continue to compile global reports on the freedom to conduct and publish opinion polls, we are stepping up our effort to produce more frequent local and regional reports through our National Representatives. All these are meant to break down as many knowledge and cultural barriers as possible. They are especially important as our WAPOR Community grows to our record size taking up more global duties.

The theme of this year's Joint Conference is “The Soul of Public Opinion Research: Liberty, Quality, and Humanity”. As our Chair of Conference Committee Wolfgang Aschauer explains so succinctly in his welcome remarks, that as we carry out our duties in this time of crisis and social turbulence, “it is imperative to pause and reflect deeply on our work... [while we] continue our discussions on technological progress and give specific attention to central issues related to humanistic development.” Thanks to the tremendous effort of Jibum, Chair of our Local Organizing Committee, we are able to continue our soul-searching exercise in Sungkyunkwan University which has a 626-year “tradition of integrating ancient wisdom with modern innovation”, as Jibum puts it.

Hopefully, after Seoul, we will continue our journey with new strengths, new insights, and most important of all, a new sense of purpose and togetherness. I wrote before, “Knowledge grows exponentially. What we have achieved over the past 75 years may well be doubled in another 25 years, if we have the will.” I have become more confident than ever, because colleagues organizing this Joint Conference together has showed me, that where there is a will there is a way. I wish every one of you a productive and memorable time in Seoul!

Robert Chung
WAPOR President
Hong Kong Public Opinion Research Institute, Hong Kong

WELCOME TO THE WAPOR 2024 CONFERENCE

Dear WAPOR conference participants,

As the Chair of the Conference Committee, I am delighted to welcome you all to the 77th WAPOR Conference in Seoul, 2024. My deepest thanks go to Jibum Kim, the Chair of the Local Organizing Committee and Kseniya Kizilova, WAPOR Executive Director, who have diligently managed all necessary procedures to ensure the event's success. I am confident that Seoul 2024 will move our organization forward. This year, we are pleased to have over 300 participants and a wide range of exceptional sessions and significant events.

The theme of our conference, "The Soul of Public Opinion Research: Liberty, Quality, and Humanity," invites us to revisit and reaffirm the foundational principles of our profession. In times of crisis and social turbulence, it is imperative to pause and reflect deeply on our work. We are witnessing authoritarian movements gaining traction, threatening freedom of speech and, consequently, the freedom of public opinion research. It is more crucial than ever to consider what liberty in public opinion research means for us all. This will be addressed in our opening keynote by Kathleen Frankovic: "Defending Polling: Why It is Necessary and How We Can Protect the Freedom to Poll."

We all recognize that we live in a world of rapid social changes, accelerated by digitalization and technological advancements, which significantly impact public opinion research. Building on our discussions in Salzburg last year, we will delve deeper into the influence of internet technologies, social media platforms, artificial intelligence, and many other recent developments. Tom W. Smith will deliver another central keynote addressing the critical issue of maintaining data quality amidst constant changes in measurement regimes.

Returning to Asia in 2024 underscores the necessity of global cooperation. We will explore how ongoing innovations in conducting, analyzing, and interpreting public opinion research amplify people's voices worldwide. As we navigate the mid-2020s, with wars and unprecedented global challenges, we must continually ask how public opinion research can help mitigate these crises. We need to get more insights into conducting interviews in trauma settings, incorporating specific risk analyses in our fieldwork, and maintaining our ethical standards and the notion of value-neutrality and scientific rigor in ideologically polarized conflicts. It is immensely important that we continue organizing panels on public opinion research in times of war, allowing diverse voices from around the world to be heard. I also want to highlight Robert's initiative to organize a roundtable on humanity. He has invested his heart and soul into this keynote event, inviting notable speakers to explore ways to promote positive values.

Maintaining WAPOR's rich tradition, the 2024 conference will also cover a broad spectrum of topics. We will continue our discussions on technological progress and give specific attention to central issues related to humanistic development. Our comprehensive agenda will include classical themes of our profession, such as electoral studies, media research, and methodological challenges. Thanks to our esteemed Asian guests, we will receive valuable insights into recent developments in public opinion research in South Korea and beyond.

Finally, I want to thank the entire Conference Committee (Jonathan Evans, USA; Olga Kamenchuk, USA; Timothy Johnson, USA; Kseniya Kizilova, Austria; and Henning Silber, Germany) for their tremendous work. We were also supported in most meetings by Robert Chung (WAPOR President), David Jodice (Vice-President), and Harrison Chace (Chair of the Educational Committee), who all contributed significantly by organizing special events, such as the roundtable on humanity, and specific awards, including the inaugural poster award. This clearly signifies that WAPOR is flourishing, and it is an honor for me to be part of this great community of researchers from around the world.

Sincerely,
Wolfgang Aschauer
Chair, WAPOR Conference Committee
University of Salzburg, Austria

WELCOME TO THE WAPOR ASIA PACIFIC 7TH ANNUAL CONFERENCE

Dear WAPOR Asia Pacific Colleagues,

A warm welcome to all to the 7th WAPOR Asia Pacific (WAP) conference, this time jointly held with WAPOR's 77th.

As you know the creation of WAPOR Asia was approved on July 6, 2016. Its name was changed to WAPOR Asia Pacific on January 1, 2022.

WAP's inaugural conference (May 2018) was held in Taipei. Next was New Delhi (September 2019). The 3rd (November 2020) and 4th (November 2021) were hosted virtually by our Malaysian and Thai colleagues, respectively. The 5th was held in Dubai (November 2022) using a hybrid format. The 6th was organized by our Australian colleagues in Canberra in December 2023. We look forward to the 8th which will be hosted by our Japanese colleagues in Tokyo on November 21 to 23, 2025. We definitely are not lacking in Asian colleagues much interested in continuing to provide a venue for interacting with scholars around the world and learning from each other about research that is undertaken to make quality of life better and meaningfully felt.

Going through the program, one will note a wide array of topics covered. Thankfully since all papers will be uploaded to the WAPOR website, there will be that opportunity to contact authors and perhaps to collaborate on topics that will dive in deeper into the challenges of the research. It is much appreciated that WAPOR is finding ways to assist chapters in boosting its membership and developing partnerships.

Matthew Gray, WAP's Vice-President/ President elect has taken the responsibility of hosting WAP's website at the Australian National University. This way among other papers presented in previous WAP conferences and of course in the current conference in Seoul can be archived at its own website. Access to these will be much facilitated and subsequently inform discussions and create synergies to better advance a more robust analysis.

Again, I reiterate. I warmly wish everyone fruitful conversations and commend organizers of this conference.

Sincerely,
Linda Luz Guerrero
President, WAPOR Asia Pacific Regional Chapter
Social Weather Stations, Philippines

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference
28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

WELCOME TO SEOUL

Dear Participants,

On behalf of the Local Organizing Committee, it is my great pleasure to welcome you to the 77th Annual Conference of the World Association for Public Opinion Research (WAPOR) and the 7th Annual Conference of the WAPOR Asia Pacific Regional Chapter, taking place from July 28-31, 2024, in Seoul, Republic of Korea.

Hosted by the Survey Research Center at Sungkyunkwan University, and co-organized with esteemed partners including the National Research Council for Economics, Humanities, and Social Sciences; Korean Sociological Association; Korean Association of Party Studies; the Korean Association for Survey Research; KOSSDA-Korea Social Science Data Archive; the Institute of Social Development and Policy Research at Seoul National University; and PMI, this conference promises to be a remarkable event.

This year's conference theme, "The Soul of Public Opinion Research: Liberty, Quality, and Humanity," invites us to explore and celebrate the core values that guide our field. It is fitting that we gather at Sungkyunkwan University, an institution with a 626-year history of academic excellence and a commitment to fostering leaders who strive for self-improvement and societal contribution. Founded in 1398, Sungkyunkwan University embodies a rich tradition of integrating ancient wisdom with modern innovation.

Our venue, the Humanities and Social Sciences Campus, is situated within the historic city walls of Seoul and overlooks Changdeokgung, a UNESCO World Heritage Site. This setting offers a unique blend of historical significance and contemporary relevance, mirroring the dynamic evolution of our field.

We extend our heartfelt thanks to our sponsors for their invaluable support. Among our sponsors and exhibitors this year are Seoul Metropolitan Government; Ministry of Unification; Center for Social Value Enhancement Studies; D3 Design Data Decisions; Gallup Korea; Hankook Research; K-stat; Jason TG; Langer Research Associates; Survey Research Center at the University of Michigan; Gallup International; Research & Research; NORC at the University of Chicago; Survey Research Lanka; Westat; KODAQs; and Roper Center. Their contributions are instrumental in making this conference a success.

To ensure a smooth experience, here are some key locations within our venue. The 600th Anniversary Hall will host the Welcome Reception, Keynote Speeches, the WAPOR Business Meeting, and lunch breaks. The International Hall will accommodate Registration, Training Workshops, all Conference Sessions, the Poster Session, and Sponsors exhibition.

I am confident that the diverse and insightful presentations, discussions, and networking opportunities over the next few days will inspire and enrich us all. Let us take this opportunity to share knowledge, forge new collaborations, and advance the frontiers of public opinion research.

Welcome to Seoul and enjoy the conference!

Jibum Kim
Chair, Local Organizing Committee
Sungkyunkwan University, Republic of Korea

CONGRATULATORY ADDRESS

Distinguished guests, esteemed colleagues, members of WAPOR, and all participants,

It is a great privilege to address you today as we gather here in Seoul, Korea, for the 77th Annual Conference of WAPOR and the 7th Asia Pacific Joint Annual Conference. On behalf of the National Research Council for Economics, Humanities and Social Sciences (NRC), I extend a warm welcome to all of you.

I would like to express my heartfelt gratitude to WAPOR for organizing this conference, and it is a great honor to be a co-host of the first WAPOR annual conference to be held in Korea. I would like to thank President of WAPOR, Robert Chung, President of WAPOR Asia Pacific Regional Chapter, Linda Guerrero and Conference Chair Wolfgang Aschauer for their leadership in organizing this event. I would also like to thank Sungkyunkwan University for being a gracious and welcoming host to us all.

In addition, my sincere gratitude goes to Minister of Unification Kim, Young Ho, for his support in making this momentous conference possible, as well as Senior Columnist Lee, Ha Kyung of JoongAng Ilbo Daily for his kind interest and encouragement in our endeavors.

The NRC and its affiliated twenty-six national research institutes of Korea are dedicated to evidence-based research in support to devise policy solutions that can better serve the citizens of Korea. As Chairperson, I believe I speak for all my fellow researchers when I say, "Quality Data and Objective Evidence is the foundation and precondition of policy research."

Though data and evidence come in many different forms, public opinion research and surveys play a crucial role in policy research. The NRC's strategic research agendas are formulated based on survey studies. Analytical understanding of the status quo that serves as the basis of many of our research efforts often relies on public opinion data, and many forms of policy evaluations incorporate qualitative and quantitative opinion analysis.

For the NRC to be an objective and credible source of research and policy insight in service of the citizens of Korea, our sources and evidence must be of the best quality, clear of distortion. Thus, the theme of the conference, "The Soul of Public Opinion Research: Liberty, Quality, and Humanity," is perfectly aligned with the core values of the NRC.

Public opinion research plays a pivotal role in the institution of democracy. To have an objective understanding, research must be conducted without biases and unwarranted influences. As a public institute in service of the populace, we strive to adhere to the principles of integrity and transparency.

Quality is the cornerstone of effective public opinion research. The reliability and validity of our findings hinge on the rigor of our methodologies and the precision of our analyses. As researchers, we are tasked with the responsibility of producing high-quality data that policymakers and the public can trust.

Lastly, at the core of our research endeavors, our fundamental mission is to better human lives. Public opinion research, in particular, is a pursuit to understand the hopes, aspirations, and concerns of the people, to garner a holistic and inclusive picture of our society. In a world that is increasingly polarized and divided, the human aspect of our research becomes all the more important. We must approach our work with empathy, compassion, and a genuine desire to make a positive impact.

In this conference, we have the opportunity to learn from each other's best practices, share innovative techniques, and collectively raise the bar for quality in public opinion research. I am proud to say that researchers from the Korea Institute of Public Administration (KIPA), the Korea Institute of Criminology and Justice (KICJ), Korea Institute for National Unification (KINU) and the KDI School of Public Policy will be taking part in this conference to share insights and actively contribute and engage with WAPOR.

As we embark on the proceedings of the WAPOR Annual Conference, I have no doubt that the discussions today will push the boundaries of what is possible and serve as the basis for a better understanding of our world, our society, and our people.

In closing, I extend my deepest appreciation to WAPOR for organizing this remarkable event and to all of you for your participation. Welcome to the WAPOR Annual Conference and welcome to Korea!

Dong Cheon Shin

Chairperson, National Research Council for Economics, Humanities, and Social Sciences

The Soul of Public Opinion Research: Liberty, Quality and Humanity

WAPOR has met twice after the subsidence of the global pandemic. In Dubai we reviewed the world's 75 years of public opinion research development after the last world war, and in Salzburg we discussed the challenges of technology on opinion research. It is time that we look back at the basic values of our profession and discuss how we can overcome all present-day challenges facing humankind without losing sight of our fundamental beliefs.

As a continuation of our Salzburg discussion, at the 2024 conference we shall continue to explore the challenges posed by internet technologies, social media platforms, artificial intelligence, quantum computing, and a lot more. We will continue to ask questions like: What threats do non-probability samples and AI pose to public opinion research and election forecasting? What are the challenges and opportunities in big data analytics? What are the latest developments in public opinion research, misinformation, and the study of campaigning and voting behavior? But in 2024 we draw our attention to analyzing the role and application of survey research in monitoring public opinion across the world, and how continuous and ongoing innovations in the conduct, analysis and interpretation of public opinion research has helped to make people's voices heard across the globe.

As we head towards the mid-2020s, the world is again facing wars and many unprecedented global challenges, and we need to ask ourselves again and again how public opinion research can mitigate these global problems and crises. We plan to specifically address questions around the topics what we have learned from public opinion and elite opinion over time and what does the latest public opinion research tell us about the pressing societal issues. We need to study ways to promote positive values, and resolve national, social, ethnic, and even cultural conflicts. We obviously need to protect the right of people's voices to be heard, thereby bringing liberty and equality to the equation of humanity. We need to go back to these core values. The 2024 conference in Seoul should be a stop for this soul-searching journey.

As a continuation of our WAPOR tradition, the 2024 conference theme is broad. We will continue our discussion of technology advancement, bring in new topics related to humanistic development, and we will not drop our longstanding 'classical' public opinion research topics of importance such as electoral studies, freedom to publish polls, the quality of public opinion research around the world, traditional media research, methodological challenges in public opinion research and so on.

The upcoming conference presentations, posters, and panels will include, but are not limited to topics such as protecting the core values of public opinion research; freedom to conduct and publish opinion research; public opinion and conflict resolution; public opinion and public diplomacy; public opinion, policymaking, and survey research; public opinion, elections, and voting; political behavior, participation, and culture in survey research; methodological challenges and improvements in the areas of sampling, measurement, survey design and survey response or non-response; panel studies, longitudinal surveys and established national survey programs monitoring public opinion; survey research applications; data archiving for the advancement of humanity; news, media, journalism, and public opinion; new sources of information on public opinion and the use of social media; public opinion and misinformation; Artificial Intelligence (AI) challenges in public opinion research and survey methods; big data, sentiment analysis and machine learning; digitalization and new sources of information in survey research; alternative methods to express public opinion among the others.

SUNGKYUNKWAN UNIVERSITY

Sungkyunkwan University is a national university with 626 years of glorious history and shining tradition and is a representative symbol of a leading university which leads the new era. At the same time, the university has led the development of higher education in Korea by challenging and innovating with a mind for sharing and coexistence. Sungkyunkwan University was founded at the beginning of the Joseon Dynasty in 1398 as the highest national educational institute in the early years of the Joseon Dynasty in Korea. As the oldest university in East Asia, it has fostered leaders of our society for over 600 years.

'SKKU's main ideology, 수기치인 (修己治人) pronounced 'Su-Gi-Chi-In', teaches that SKKU students strive to perfect themselves as leaders and contribute to our society. This ideology is the fundamental principle by which SKKU brought up leaders of our society for over 600 years, thus contributing to evolution of our society. Sungkyunkwan University continuously strives to integrate its founding tradition philosophy with the modern technology in order with a view to cultivating global graduate's talents who will lead the 21st century. Old Sungkyunkwan was founded over 600 years ago by royal decree to promote education the scholarship in Confucianism. As nation's highest educational institution, Old Sungkyunkwan went through vicissitudes with the country it served over the centuries.

Though a long history alone cannot guarantee the excellence of an institution, the rich culture, is surely a unique and valuable asset of the university. What the university has achieved in the past fifty years meets and exceeds that of the preceding history. We take pride in the university's innovative spirit; as a result of the long efforts to place natural sciences on an equal footing with our strong foundation in humanities, we now operate two campuses: the Humanities and Social Sciences Campus and the Natural Sciences Campus. Based on a highly successful partnership with Samsung which has generously funded several core initiatives, the university has been rapidly developing and prospering since 1996.

The Humanities and Social Sciences Campus (the host of this year's WAPOR conference) is located inside the original city wall, which defined the boundaries of the old capital during the Joseon Dynasty. It is overlooking Changdeokgung, the UNESCO World Heritage Site and the most well-preserved royal palace in Korea. Like Seoul, our university grew rapidly, and an expansion was needed to build the modern campus. When expanding, the science programs were moved to Suwon and the humanities and social sciences programs remained at this campus.

WAPOR 2024 CONFERENCE HOST AND CO-ORGANIZERS

LOCAL ORGANIZING COMMITTEE 2024

Chair: Jibum Kim, Sungkyunkwan University, Republic of Korea

Members:

- Doo Sup Youn, National Research Council, Republic of Korea
- Dukjin Chang, Korean Sociological Association, Republic of Korea
- U-Seok Seo, Korean Association for Survey Research, Republic of Korea
- Wonho Park, KOSSDA, Seoul National University, Republic of Korea
- Yun-Suk Lee, University of Seoul, Republic of Korea
- Dong-Kyun Im, ISDPR, Seoul National University, Republic of Korea
- Seulki Choi, KDI School of Public Policy and Management, Republic of Korea
- Minhee Cho, PMI, Republic of Korea

Student Assistants at Seungkyunkwan University:

Kyuyoung Kim, Ayoung Lee, Woogyong Kim, Suwon Lee, June Yoon, Seunghwan Kim, Doheon Kim, San Kang, Yongmin Kim, Jongbum Wee.

The Survey Research Center (SRC) at Sungkyunkwan University (SKKU) is Korea's leading academic survey research organization. SRC is responsible for creating the Korean General Social Survey (KGSS). The KGSS is a crucial social science dataset for understanding the stability and transformation of Korean society in the 21st century. The KGSS's significance is further enhanced by its inclusion of modules from the International Social Survey Programme (ISSP), the East Asian Social Survey (EASS), and the European Social Survey (ESS), which makes it an invaluable resource for comparative studies.

SCHEDULE AT-A-GLANCE

Sunday, July 28 – Day 1

- 08:00-09:00 *Registration desk is open*
08:20-08:30 *Shuttle bus departs from the Mayplace Hotel*
09:00-12:00 Training workshops: morning session
09:00-12:00 WAPOR Council meeting (by invitation)
10:00-12:00 WAPOR West Asia North Africa Chapter Meeting (by invitation)
11:00-12:00 WAPOR Asia Pacific Regional Chapter Council Meeting (by invitation)
12:00-13:00 *Lunch break*
12:00-13:00 *Registration desk is open*
13:00-16:00 Training workshops: afternoon session
13:00-15:00 WAPOR and Regional Chapters Meeting (by invitation)
15:00-17:00 *Registration desk is open*
17:00-19:30 Welcome Reception

Monday, July 29 – Day 2

- 08:00-16:00 *Registration desk is open*
08:20-08:30 *Shuttle bus departs from the Mayplace Hotel*
09:00-09:30 Conference opening and welcome
09:30-10:30 Key-note Lecture on Liberty
10:30-11:00 *Coffee break*
11:00-12:30 Featured panels (I)
12:30-13:30 *Lunch break*
13:30-15:00 Parallel sessions (I)
15:00-15:30 *Coffee break*
15:30-17:00 Parallel sessions (II)
17:00-18:30 Posters session
17:00-18:00 Meeting of WAPOR National Representatives (by invitation)

Tuesday, July 30 – Day 3

- 08:00-16:00 *Registration desk is open*
08:20-08:30 *Shuttle bus departs from the Mayplace Hotel*
09:00-10:30 Parallel sessions (III)
10:30-11:00 *Coffee break*
11:00-12:00 Key-note Lecture on Quality
12:00-13:00 *Lunch break*
13:00-14:30 Featured panels (II)
14:30-15:00 *Coffee break*
15:00-16:30 Featured panels (III)
16:30-18:00 WAPOR Business Meeting (open for all attendees)
WAPOR Asia Pacific Business Meeting (open for all attendees)
18:00-19:00 *Bus shuttle departs from the university to the awards banquet*
19:00-21:00 Awards banquet

Wednesday, July 31 – Day 4

- 08:00-15:00 *Registration desk is open*
08:20-08:30 *Shuttle bus departs from the Mayplace Hotel*
09:00-10:30 Parallel sessions (IV)
10:30-11:00 *Coffee break*
11:00-12:30 Key-note Roundtable on Humanity
12:30-13:30 *Lunch break*
13:30-15:00 Parallel sessions (V)
15:00-15:30 *Coffee break*
15:30-17:00 Parallel sessions (VI)

DIRECTIONS TO SUNGKYUNKWAN UNIVERSITY

Conference venue: Sungkyunkwan University (Humanities and Social Sciences Campus)
25-2 Sungkyunkwan-ro, Jongno-gu, Seoul, Korea

A. By Seoul Metro Line #4 (Light Blue Line)

1. Take Line #4 and get off at Hyehwa Station.
 - ① Use Exit #1 and walk straight for 50 meters.
 - ② You will see the shuttle bus stop where SKKU buses with the University logo stop (Fare: 400 KRW). Get off in front of 600th Anniversary Hall.
 - ③ Alternatively, you can take the Jongno #07 bus (Fare: 1,200 KRW).
 - **Bus Route:** Exit #1 Hyehwa Station >> Front Gate of SKKU campus >> 600th Anniversary Hall (get off) >> Front of Basketball Court.

B. By Seoul Metro Line #1 (Blue Line)

1. Take Line #1 and get off at Jonggak Station.
 - ① Use Exit #3-1 or #8.
 - ② Take the Jongno #02 Bus.
 - ③ Get off at the last stop, "Sungkyunkwan Univ." and walk down to the International Hall.

C. By Seoul Metro Line #3 (Orange Line)

1. Take Line #3 and get off at Anguk Station.
 - ① Use Exit #2.
 - ② Take the Jongno #02 Bus.
 - ③ Get off at the last stop, "Sungkyunkwan Univ." and walk down to the International Hall.

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference
28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

Humanities and Social Sciences Campus (Seoul)

1. 600th Anniversary Hall
2. Law Building
4. Faculty Hall
7. Central Library
8. Student Center
9. International Hall
16. International House
17. Yang Hyeon Gwan
31. Toegye Hall of Humanities
32. Dasan Hall of Economics
33. Business School Building
50. Hoam Hall
61. Suseon Hall
62. Suseon Hall Annex

600th Anniversary Hall:

Welcome Reception (5th floor)
Key-note speeches (5th floor, Cho Byung Doo International Conference Hall)
WAPOR and WAP Business Meeting (5th floor)
Lunch breaks (6th floor)

International Hall:

Registration (90101, 1st floor)
Training workshops (B1, B2, 1st floor)
Conference sessions (B1, B2, 1st floor)
Posters session (90101, 1st floor)
WAPOR meetings (5th floor)
Sponsors and exhibitors (90101, 1st floor)

Awards Banquet:

Floating Island Convention
1 Island, Some sevit 2085-14
Olympic-daero, Seocho-gu, Seoul, Korea

Conference venue: Sungkyunkwan University, 25-2 Sungkyunkwan-ro, Jongno-gu, Seoul, Republic of Korea

Shuttle bus provided to/from: Mayplace Hotel, 179 Yulgok-ro, Jongno-gu, Seoul, Republic of Korea

"The Hub of National Policy Research, leading Korea's Future"

We aim to solve the nation's pressing issues and present a long-term vision.

The *National Research Council for Economics, Humanities and Social Sciences* was established to support, foster, and systematically manage government-funded research institutes in the fields of economics, humanities, and social sciences. Through these efforts, NRC contributes to the support of national research policy projects and the development of the knowledge industry.

Korea Social Science Data Archive

About

**Korea Social Science Data Archive is
the largest digital archive in Korea,
leading in collecting and sharing social science data.**

It established in 2006, archives various kinds of data including survey data, aggregated data, interviews, documents, and fieldnotes produced by research institutes and individual researchers.

KOSSDA now moves forward to provide rich data resources and relevant educational opportunities for the social science research community, and to make contribution to advancing scientific knowledge and solving social issues and problems.

What We Do

- Collecting, archiving, and sharing quantitative and qualitative social science data

- Providing educational courses
- Developing educational data sets
- Supporting the research community

- KOSSDA Consortium
- Network of Asian Data Archives
- World Value Survey research network

- Open Data Action Plans
- Research on data archiving
- Korean Social Trends

KOSSDA at a Glance

Data Archiving, Sharing

Quantitative / Qualitative Data
3,400 Datasets

Data Download
11,000 annually

Education

Course offerings
25 courses annually

Student participation
1,200 annually

Data Fair
16 events, 200 participants

Cooperation Network

PMI contributes to client's decision-making process by providing **integrated data analytics solution & consulting services**.

We are presenting a new future vision of the market through the development of **big data and AI based online platform business**.

Professional Business Consulting

We provide business insights through **integrated analysis** of research data to support sustainable growth for our clients.

Distinguished Opinion Poll Solutions

We efficiently conduct **rapid and accurate opinion polls** targeting 13 million subscribers of the three major telecommunications companies in Korea through **mobile web-based surveys** tailored to specific objectives.

Data Management & Analysis

We offer **customized data solutions** to client by leveraging the **largest domestic panel** of over 3.3 million along with big data, environmental data and more.

Our journey to digital platform

We lead continuous innovation and present new visions by building an **automated platform** specialized for research market

Unisurvey, a survey platform that enables from creating surveys to generating reports on your own.

Sampick, a one-stop solution to assess consumer reactions to advertisements.

Panel Hub

Panel Hub, a big data and AI-based target panel supply system. If you need respondents for your survey link, find them on the Panel hub.

Social Value Hub

Center for Social value Enhancement Studies

01

Social Value Measurement

If social value can be measured monetarily like economic value, and if the methods and outputs can be developed to be market-acceptable, more organizations will strive to create social value. CSES researches and disseminates methodologies to monetarily measure social value created by a wide range of organizations, including social enterprises, for-profit companies, as well as public and nonprofit organizations.

02

Social Progress Credits

SPC is an incentive mechanism that measures the degree of social performance of social enterprises in monetary value and provides cash incentives in proportion.

It was first proposed by Tae-won Chey, Chairman of SK Group in South Korea, at the WEF Davos Forum in 2013. The basic idea behind SPC is that corporates will more strive for social innovation if social performance are acknowledged and rewarded by the market system.

03

Social Value Data & Academic Research

Social value is not a specific major or academic discipline, nor is it the domain of specialists only. Gathering knowledge, experience, and data of scholars from different disciplines and field experts who are interested in creating social value will lead to the ideas for a better society. CSES aims to be a knowledge platform in this end.

04

Environmental Protection Credits

Environmental Protection Credit(EPC) is an incentive mechanism based on the emission reduction potential(ERP) that enables early compensation for the climate solution owners. Designed to boost carbon emissions reduction, EPC facilitates development and commercialization of innovative solutions that have had difficulties in attracting investment despite their high reduction potential due to their less mature technologies, thereby making the efforts to reach net zero more effectively.

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference
28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

SUNDAY, JULY 28 – DAY 1 (TRAINING WORKSHOPS)

Time	Room	Activities
08:20-08:30	-	Shuttle bus departing from the Mayplace Hotel
08:00-09:00	1 st floor 90101	Registration desk is open (International Hall Building)
09:00-12:00	1 st floor 90110	Workshop 1: Cross-Cultural Surveys – by <i>Henning Silber (GESIS - Leibniz Institute for the Social Sciences, Germany)</i> and <i>Christof Wolf (GESIS - Leibniz Institute for the Social Sciences, Germany)</i>
International Hall Building	1 st floor 90109	Workshop 2: Multilevel regression and Poststratification – by <i>Yajuan Si (University of Michigan, USA)</i>
	1 st floor 90104	Workshop 3: Respondent Driven Sampling: Overview and Practical View – by <i>Sunghye Lee (University of Michigan, USA)</i>
	B1 9B118	Workshop 4: Augmenting Surveys with Data from Smartphone Sensors and Apps: Best Practices – by <i>Florian Keusch (University of Mannheim, Germany)</i> and <i>Bella Struminskaya (Utrecht University, the Netherlands)</i>
	5 th floor	WAPOR Council Meeting (by invitation)
10:00-12:00	5 th floor	WAPOR West Asia North Africa Chapter Meeting (by invitation)
11:00-12:00	5 th floor	WAPOR Asia Pacific Chapter Council Meeting (by invitation)
12:00-13:00	6 th floor	Lunch break (600 th Anniversary Hall Building)
12:00-13:00	1 st floor 90101	Registration desk is open (International Hall Building)
13:00-16:00	1 st floor 90109	Workshop 5: Communicating Opinion Polls to Journalists – by <i>Gary Langer (Langer Research Associates, USA)</i>
International Hall Building	1 st floor 90110	Workshop 6: Web and Multimode Surveys Using Free (Open Source) Tools – by <i>Adam Zammit (Australian Consortium for Social and Political Research, Australia)</i>
	B1 9B118	Workshop 7: Questionnaire Design for Cross-Cultural Surveys by <i>Lydia Repke (GESIS - Leibniz Institute for the Social Sciences, Germany)</i>
	1 st floor 90104	Workshop 8: Applied Introduction to the Collection of Paradata and Sensor Data – by <i>Jan Karem Höhne (Leibniz University Hannover, Germany)</i>
13:00-15:00	5 th floor	WAPOR and Regional Chapters Meeting (by invitation)
15:00-17:00	1 st floor	Registration desk is open (International Hall Building)
17:00-19:30	5 th floor	Welcome Reception (600 th Anniversary Hall Building)

TRAINING WORKSHOPS 2024

CROSS-CULTURAL SURVEYS

This workshop focuses on cross-cultural survey research and can be combined with the workshop on “questionnaire design for cross-cultural surveys.” Using the ISSP and ESS as examples, the workshop emphasizes issues that have to be taken into account when conducting surveys in more than one country or culture. The course begins by positioning cross-cultural survey research in the Total Survey Error framework. From there, we discuss specific problems of measurement and representation in cross-cultural research. Concerning the measurement, we briefly discuss questionnaire design from a cross-cultural perspective, including challenges of translation, harmonization, and applying international standard classifications in the survey context. This will be followed up by considerations of the mode of data collection and sampling, two crucial elements determining what part of the population is represented by a survey. Then, we turn to aspects of fieldwork monitoring. This leads us to approaches of survey data quality within cross-cultural surveys.

Henning Silber is head of the Survey Operations team at GESIS – Leibniz Institute for the Social Sciences and lecturer in quantitative social science at the University of Mannheim, Germany. His research interests include survey methodology, political sociology, and experimental social science research. His work on cross cultural surveys includes a book chapter on the association of culture and survey error: Silber, H., & Johnson, T. P. (2020). Culture and response behavior: An overview of cultural mechanisms explaining survey error. Understanding survey methodology. In: Sociological theory and applications edited by P. Brenner, pp. 67-86. Since January 2022, Henning serves as the Publications Chair of WAPOR.

*Christof Wolf is president of GESIS Leibniz-Institute for the Social Sciences and professor of sociology at University of Mannheim. His research interests include survey methodology and social stratification. He studied Sociology, Economics, Economic and Social History and Statistics at Hamburg University. In 1996 he received his doctorate in sociology at the University of Cologne and was awarded the *venia legendi* for sociology in 2003. From 2004 to 2015 Christof Wolf was Scientific Director of the department “Monitoring Society and Social Change”. He recently co-edited: Irina Tomescu-Dubrow, Christof Wolf, Kazimierz M. Slomczynski, & J. Craig Jenkins (Eds.). (2024). *Survey Data Harmonization in the Social Sciences*. Hoboken, New Jersey: Wiley.*

MULTILEVEL REGRESSION AND POSTSTRATIFICATION

Multilevel regression and poststratification (MRP), a method originally applied to political polls, has become increasingly popular with applications to demography, epidemiology, and many other areas. Adapted from hierarchical models, MRP is an approach to modeling survey or other nonrepresentative sample data that has the potential to adjust for complex design features and nonresponse bias while performing small area estimation. The workshop covers the statistical concepts and practical issues in implementing MRP with real-life application examples. We will introduce the assumptions and properties of MRP, connecting with small area estimation and data integration methods. Recent developments of MRP for survey weighting and inference of probability/non-probability samples will be covered. We will conclude with some cautions and challenging issues in the application of MRP.

Yajuan Si is a Research Associate Professor in the Institute for Social Research at the University of Michigan. She received her Ph.D. in Statistical Science in 2012 from Duke University. Dr Si's research lies in cutting-edge methodology development in streams of Bayesian statistics, linking design- and model-based approaches for survey inference, missing data analysis, confidentiality protection involving the creation and analysis of synthetic datasets, and causal inference with observational data. Yajuan has extensive collaboration experiences with interdisciplinary researchers to improve the application of statistics in many different substantive fields, and she has been providing statistical support to solve sampling design and analysis issues on health and social science surveys.

RESPONDENT DRIVEN SAMPLING: OVERVIEW AND PRACTICAL VIEW

There is no clear practical, cost-effective solution in probability sampling, when data collection targets rare, hidden and/or elusive populations. Even with unlimited resources, minoritized groups' low participation presents another challenge. Respondent driven sampling (RDS) has been proposed and used to fill this gap. RDS is feasible because of human nature— RDS is feasible because of human nature—we are connected to other people and form stronger ties with others who share similar characteristics. The peril in RDS implementation, however, is that the recruitment success is dependent on participants' willingness to recruit others and their subsequent follow-through. These are not under researchers' control and difficult to predict before the fieldwork begins.

This course is designed for survey researchers and social scientists with varying levels of familiarity with RDS. The participants will learn theoretical and practical premises of RDS, design options for RDS studies through existing applications of RDS and how to optimize RDS data collection. The course also will discuss topics related to RDS data confidentiality and data analysis, including its statistical properties and types of analyses unique to RDS data. Throughout the course, the emphasis will be given to the practice of RDS.

In addition to the course slides, this course will provide a toy RDS data and R codes which will be used to demonstrate RDS data collection monitoring, data analysis and data visualization in the course. Moreover, a short tutorial on an R function that guide design decisions will be provided.

Sunghee Lee is a Research Associate Professor and a Director of Program in Survey and Data Science at the Institute for Social Research, University of Michigan. She is a survey methodologist whose research interest evolves around improving data quality through inclusivity, which has profound implications for equity in social programs and policy decisions. Specifically, she has examined two angles of data quality: representation and measurement. Her research focuses on identifying and addressing error sources that affect inclusivity, including coverage, nonresponse, translation, question order and response style, often in the intersection with cultural norms. She leads the sampling aspect of the Health and Retirement Study and is a principal investigator of multiple federally funded studies that apply RDS for recruiting hard-to-reach populations and population subgroups.

AUGMENTING SURVEYS WITH DATA FROM SMARTPHONE SENSORS AND APPS: BEST PRACTICES

Smartphone sensors (e.g., GPS, camera, accelerometer) and apps allow researchers to collect rich behavioral data, potentially with less measurement error and lower respondent burden than self-reports through surveys. Passive mobile data collection (e.g., location tracking, call logs, browsing history) and respondents performing additional tasks on smartphones (e.g., taking pictures, scanning receipts) can augment or replace self-reports. However, there are multiple challenges to collecting these data: participant selectivity, (non)willingness to provide sensor data or perform additional tasks, ethical issues, privacy concerns, usefulness of these data, and practical issues of in-browser measurement and app development. This course will address these challenges by reviewing state-of-the-art practices of smartphone sensor data collection, ranging from small-scale studies of hard-to-reach populations to large-scale studies to produce official statistics, and discuss design best-practices for sensor measurement. Recommendations provided will include: What research questions can be answered using smartphone sensors and apps? What are participants' concerns and how to address them? How to ask for consent for sensor measurements and ensure participation?

This course will discuss methods of assessing data quality and touch upon the analysis of passively collected data. The course will not provide analytic methods for “found” data nor demonstrate how to program smartphone sensor apps. The course is intended for survey practitioners, researchers, or students who want a practical introduction to smartphone sensor-based research. No prior knowledge of smartphone sensors is required, but a basic understanding of survey practice and survey errors is helpful.

By the end of the course participants will: a) know what smartphone sensors are available and what they can measure to facilitate and enhance surveys; b) be able to identify potential applications of smartphone sensor measurement for their own data collection; c) be able to anticipate practical

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference

28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

issues when implementing smartphone sensor data collection. Note that this course can be combined with “An applied exercise for collecting paradata and sensor data” taught by Jan Karem Höhne in the afternoon.

Florian Keusch is Professor of Social Data Science and Methodology in the Department of Sociology at the University of Mannheim and Adjunct Research Professor in the Joint Program in Survey Methodology (JPSM) at the University of Maryland. He studies the quality of digital behavioural data from wearables, apps, and sensors and how they can complement survey data to better measure attitudes, behaviours, and social interactions. He also serves on the Faculty Board of the International Program in Survey and Data Science (IPSDS) and is Associate Editor of Survey Research Methods.

Bella Struminskaya is Associate Professor at the Department of Methodology & Statistics at Utrecht University. Before that she was a senior researcher at GESIS – Leibniz Institute for the Social Sciences at the Department Survey Design and Methodology. Her research interests include survey methodology, smartphone surveys, smartphone sensors & passive data collection using mobile devices, online and mixed-mode surveys, nonresponse and measurement errors in surveys, panel effects, and paradata. Bella is a board member of the German Society for Online Research and programme chair of the General Online Research Conference (GOR). Bella is an associate editor of the Journal of Survey Statistics and Methodology, Survey Research Methods and a guest editor of Public Opinion Quarterly, Social Science Computer Review, and the Journal of Royal Statistical Society Series A.

COMMUNICATING OPINION POLLS TO JOURNALISTS

Public opinion researchers and journalists often cross paths, and for good reason: they share the core goal of producing meaningful information about the issues of our day and the condition of our societies. They share a common approach, as well: Survey researchers go to their best sources, ask their best questions and report what they found out. Journalists do precisely the same. Yet communication between the two camps often is suboptimal. The reasons again are clear: While their goals and broad approach are shared, their methods diverge. Researchers' work is circumscribed by the demands of scientific inquiry, shaped by methodology, subject to uncertainty and infused with complexity. Journalists need a straightforward story, a snappy headline – and confidence they're not being played.

This workshop will seek to bridge the gap between the two, seeking a common language and understanding. We'll look at examples of journalists misreporting polls – and of pollsters misreporting news. We'll examine best practices on both sides – for researchers in talking to journalists about polls, and for reporters in making poll coverage decisions. The aim of this workshop is not to endorse or extend the use of polling as a public relations tool. Quite the opposite: We'll explore the ways in which survey researchers can contribute to the aims of journalism, through clarity, accuracy and transparency, in order to help both disciplines achieve their shared goal of an informed society. The latter portion of the workshop will include group discussion of successes and failures in communication with journalists. Participants are encouraged to bring in short descriptions of surveys they've produced that they see as newsworthy, for use in role play with a skeptical journalist.

Gary Langer is founder and president of Langer Research Associates, a New York-based survey research firm that produces news polls for the ABC News Television Network, investigates complex public policy issues for nonprofits and foundations and manages international surveys for Pew Research Center and other partners. Langer previously served as longtime director of polling at ABC News and as a newsman at The Associated Press. His work has been recognized in two news Emmy awards, 10 Emmy nominations and the 2010 Policy Impact Award of the American Association for Public Opinion Research. He's vice chair of the Roper Center for Public Opinion Research and WAPOR's U.S. representative.

WEB & MULTIMODE SURVEYS USING FREE (OPEN SOURCE) TOOLS

Having software that is free of cost is an easy sell, but source code freedom has many other advantages: self-hosting ability, full control of data and privacy, and the ability to modify the software to suit your needs to name a few.

The workshop will include the installation of a suite of free and open-source software tools for conducting surveys in multiple modes on your own device, then run through the use of these tools. The core tool is LimeSurvey, a powerful and free web based survey tool, which acts as a questionnaire authoring and web based data collection tool. Also demonstrated will be the Android Offline Surveys app for CAPI, queXS for CATI and queXF for PAPI data entry (queXS and queXF are developed by the author of this workshop). Course objectives and planned hands-on activities: 1) What is free / open source software and why does it matter; 2) Obtaining and installing the software (please bring a laptop, otherwise you can watch as a demonstration); 3) Setting up a “base” questionnaire in LimeSurvey; 4) Using the suite of tools to deliver the questionnaire in multiple modes (CAPI, CATI, CAWI, PAPI); 5) Limitations of the tools. The workshop consists mainly of hands-on activities, including the installation and use of the tools, followed by a Q&A session.

Adam Zammit is the Director of Operations at the Australian Consortium for Social and Political Research (ACSPRI). Adam is the lead developer and maintainer of a suite of free / open-source tools for survey research (queXML, queXF, queXS and queXC) and is a contributor to the LimeSurvey project. Adam also manages many survey projects, including web, telephone and paper-based studies. Current projects include data collection for the Australian Survey of Social Attitudes (AuSSA) – a national postal survey that incorporates the ISSP module for Australia.

QUESTIONNAIRE DESIGN FOR CROSS-CULTURAL SURVEYS

In cross-cultural research, special attention to the development of survey items is paramount to ensure that they measure what they intend to measure and that they do so in a comparative way across different cultures and languages. This workshop is an extension of the “Cross-Cultural Surveys” workshop. However, participation in that workshop is not a prerequisite for participation in this workshop, which aims to equip participants with the fundamentals of cross-cultural research, focusing on creating comparable multilingual measurement instruments. In addition, participants will be introduced to techniques and tools for evaluating and pretesting questionnaire items. Finally, the workshop will illuminate key considerations in the translation process, identifying potential pitfalls and sources of error, thereby fostering a comprehensive understanding of the challenges inherent in cross-cultural survey designs.

Lydia Repke is a social scientist who heads the Scale Development and Documentation team while also leading the Survey Quality Predictor 3.0 (SQP) project at GESIS – Leibniz Institute for the Social Sciences. Additionally, she holds a membership in the Young Academy of the Academy of Sciences and Literature, Mainz and serves as an elected board member of the “Sociological Network Research” Section within the German Sociological Association. Lydia graduated from the double master’s degree program European Master in Government of the University of Konstanz, Germany, and University Pompeu Fabra, Spain, where she received her doctor’s degree in cultural psychology (2017) and the Special Doctorate Award for her thesis on multicultural identifications and personal social networks. With her expertise in data quality of survey questions, egocentric network analysis, and multiculturalism, Lydia is dedicated to knowledge transfer through teaching, consulting, and science communication in these areas.

APPLIED INTRODUCTION TO THE COLLECTION OF PARADATA AND SENSOR DATA

Technological advancements, coupled with digital social change, provide novel research avenues for social and behavioural scientists. The global increase in high-speed (mobile) Internet and electronic device ownership moves daily life to digital spheres. In this short course, I give an applied introduction to the collection of various paradata (e.g., response times, window/browser tab switching, and user agent strings) and sensor data. The latter ones are distinguished into passively collected sensor data (e.g., acceleration and Global Positioning System data) and actively collected sensor data (e.g., image and voice data). For this purpose, I present program codes (mainly JavaScript) and how to implement these codes for the collection of paradata and sensor data. Importantly, the course includes applied data collection exercises in which participants: 1) work with the codes; 2) learn to collect the various data themselves; 3) accumulate knowledge about data characteristics (e.g., structured and unstructured); 4) and get novel insights into data handling.

As basis for the data-driven showcases, I will use the survey software solution Unipark (www.unipark.com). Previous knowledge on digital data and/or programming skills are not mandatory, but it is suitable to attend this course as well as the course “Augmenting surveys with data from smartphone sensors and apps: best practices” by Bella Struminskaya and Florian Keusch. Participants are encouraged to prepare questions concerning current and future studies and to bring a laptop PC for the exercises. They also receive access to all program codes that are introduced during the short course. At the end of the workshop, the participants will be able to: 1) independently employ codes for collecting paradata and sensor data; 2) decide on best practices when it comes to data handling and processing; 3) and critically reflect upon the merits and limits of various digital data and their suitability for empirical studies in the framework of social and behavioural science.

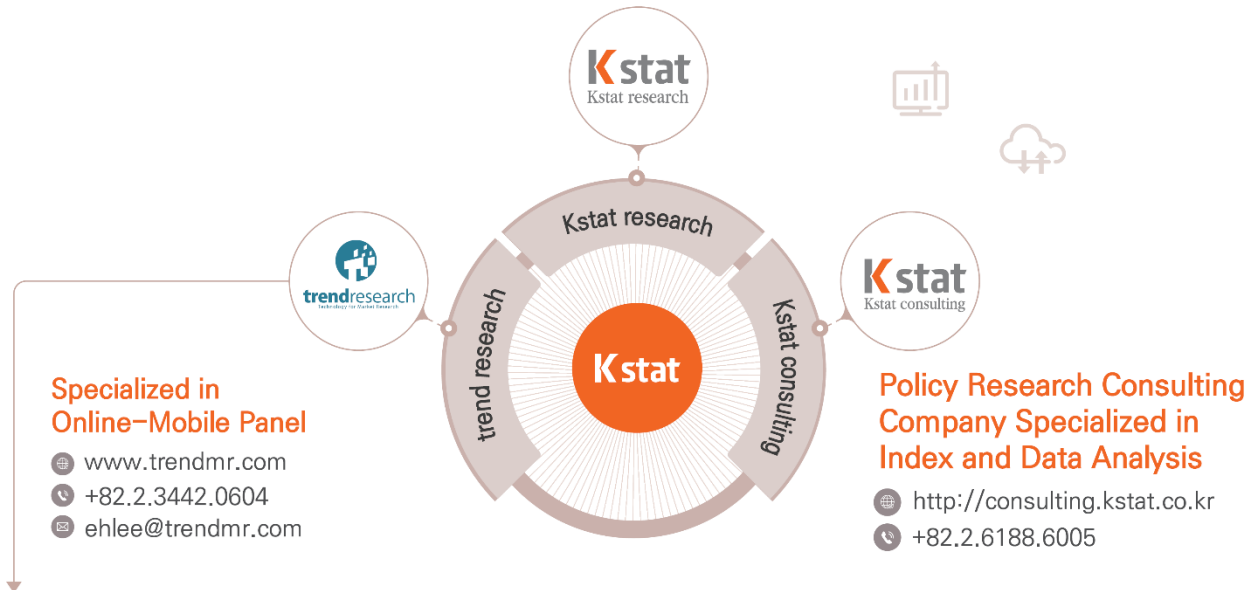

Jan Karem Höhne is junior professor at the Leibniz University Hannover in association with the German Centre for Higher Education Research and Science Studies and head of the CS3 lab for Computational Survey and Social Science. Currently, he is visiting professor at the Department of Methodology and Statistics at Utrecht University and permanent research fellow at the Research and Expertise Centre for Survey Methodology at the University Pompeu Fabra in Barcelona. Before that, he was senior postdoc in the ERC-funded POLITSOLID project at the Political Science Department at the University of Duisburg-Essen, research fellow of the German Academic Exchange Service at the Institute for Social Research at the University of Michigan, and Fulbright fellow at the Department of Communication at Stanford University. His research combines survey research and computational social science. I employ Automatic Speech Recognition, Natural Language Processing, and generative AI applications for measuring political and social attitudes. This also includes the exploration of new, digital data sources and forms for empirical social research.

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference
28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

MONDAY, JULY 29, 2024 – DAY 2

Jul 29	Room	Sessions
08:20-08:30	-	Shuttle bus departing from the Mayplace Hotel
08:00-16:00	1 st floor 90101	Registration desk is open (International Hall Building)
09:00-09:30	Cho Byung Doo International Conference Hall	<p>CONFERENCE OPENING (600th Anniversary Hall Building, 5th floor)</p> <p>Session moderator: Minyoung Yoo, June Yoon (First-time WAPOR attendees, Republic of Korea)</p> <p><u>Speakers:</u></p> <p>YungHo Kim (Minister, Ministry of Unification, Republic of Korea) DongCheon Shin (Chairperson, National Research Council for Economics, Humanities, and Social Sciences, Republic of Korea) Hakyung Lee (Chief reporter, JoongAngIlbo, Republic of Korea) Robert Chung (WAPOR President, Hong Kong) Linda Luz Guerrero (WAPOR Asia Pacific Chapter President, Philippines) Wolfgang Aschauer (WAPOR Conference Chair, Austria)</p>
09:30-10:30	Cho Byung Doo International Conference Hall	<p>KEY-NOTE LECTURE ON LIBERTY (600th Anniversary Hall Building, 5th floor)</p> <p>Defending Polling: Why It is Necessary and How We Can Protect the Freedom to Poll</p> <p><u>Speaker:</u> Kathleen Frankovic (Independent Consultant, USA)</p> <p><u>Session moderator:</u> David Jodice (D3 Systems, USA)</p> <p>Polling is a necessary and beneficial part of democracy, providing information to both the government and the governed. But it faces many threats. They range from outright attacks on individuals, their institutions, and individual projects, to limits that continue to be set by governments, to attacks by politicians and the media, to less obvious threats like poor reporting, and even threats caused by the decisions that pollsters themselves make. Why should we defend polling? What is the value of opinion and election polls? How can we make the best case for polling protection and freedom? This keynote will discuss the importance of opinion polls in a democracy, review how polls became so dominant a part of global politics and examine the important role the news media had in polling's expansion. It will describe the current threats polling faces, and propose potential remedies, describing the ways individuals and global and national associations can combat the threats to opinion polls.</p>
10:30-11:00	B1, B2, 1 st floor	Coffee break (International Hall Building)
11:00-12:30	B1, B2 1 st floor	Featured panels (I): International Hall Building
11:00-12:30	B1 9B118	<p>EXAMINING TEN YEARS OF DELIBERATIVE POLLING IN KOREA</p> <p><u>Panel Chair:</u> James Fishkin (Stanford University, USA)</p> <p>Bullying and Harassment in the Metaverse: Deliberative Perspectives from Korea, Japan, Hong Kong and Taiwan Alice Siu (Stanford University, USA), Shinya Wakao (The University of Texas at Austin, USA), Hugo Tai (Oxford University, UK)</p> <p>When Deliberation is Unequal: Opinion Minorities, Opinion Support, and Opinion Change in Small Group Deliberation Nuri Kim (KAIST, Republic of Korea)</p> <p>Advancing Democratic Engagement: A Case Study of Public Deliberation on Reforming the National Assembly Election System in Korea Seokho Kim (Seoul National University, Republic of Korea), Chun Seok Kim (Hankook Research, Republic of Korea), Woo-Yeon Jung (Seoul National University, Republic of Korea)</p> <p>Unboxing Deliberation: Using Transcripts from Shin Kori Public Deliberation to Identify Participants' Concerns Young Jee Kim (Stanford University, USA)</p>

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference

28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

Jul 29	Room	Sessions
11:00-12:30	B2 9B217	<p>INTERNATIONAL SOCIAL SURVEY PROGRAMME: A DISCUSSION OF QUALITY AND COMPARABILITY OF CROSS-CULTURAL METHODS <u>Panel Chair:</u> Rene Bautista (NORC at the University of Chicago, USA)</p> <p>Gender Role Attitudes in the Philippines and Elsewhere Harry Ganzeboom (Independent Consultant, Netherlands), Linda Luz Guerrero (Social Weather Stations, Philippines), Gerardo Sandoval (Social Weather Stations, Philippines)</p> <p>A Within-Country Comparison Using Cross-National Surveys: An Examination on Mode Effect Pei-shan Liao (RCHSS, Academia Sinica, Taiwan)</p> <p>Treating Translation as a Scientific Component of Cross-National Research: The Role of Quantification and Experiments Tom W. Smith (NORC at the University of Chicago, USA)</p> <p>Survey Data Quality Methods for ISSP and DATIS Ioannis Andreadis (ELKE A.P.TH., Greece)</p>

DESIGNS

DATA

DECISIONS

We are a collaborative team of analysts & statisticians with extensive international research experience who tailor each project to meet your specific needs. Our research **DESIGNS** allow for high quality **DATA** collection wherever you need it, empowering you to make evidence based **DECISIONS**.

On the ground. In the field.
Wherever you need us.

D3 helps you tell your data's stories to
achieve the greatest possible impact.

It investigates the power of presenting numbers on stage to create a visual and immediate connection with viewers, prompting them to compare statistical data with their own choices and experiences. The traditional presentation of statistics can often feel abstract and detached, making it challenging for audiences to fully grasp the significance of the numbers. However, by incorporating theatre techniques, such as visualizations and dynamic performances, statistical information can be brought to life on stage. This panel examines the potential of this approach and discusses the limitations and considerations associated with the casting process.</p> <p>From Spreadsheet to Spotlight: How 100 people on Stage reflect the Narrative of Urban Data Lai Sim Fong Zoe (On&On Theater Workshop, Hong Kong)</p> <p>Beyond the Numbers: Exploring the Personal Stories that Emerge from Staged Urban Data Wen Szu Ni (Independent Researcher, Taiwan)</p> <p>My Personal experience as an opinion researcher embedded in the presentation of “100% Hong Kong Robert Chung (Hong Kong Public Opinion Research Institute, Hong Kong)</p> <p>My personal experience as a government official embedded in the presentation of “100% Gwangju Choi Ok-Hee (Statistics Korea, Republic of Korea)</p>

- 18:00 End of the meeting

The Best Partner to Enhance Client
Value upon Trust.

- **Research & Research(R&R) was established in 1989**
- Selected as a **Korean vendor for Gallup Organization** in 2004.
- Conducting the **Gallup World Poll*** in South Korea since 2005.
* Gallup World Poll is a global survey that investigates the attitudes and behaviors of the world's population. Since 2005, it has been conducted annually in over 150 countries. In South Korea, R&R is the exclusive organization conducting this survey.
- Joined the **OPEN WORLD Network** in 2008.
- Selected as **Gallup Organization's 'Global Best Partner'** in 2018 and 2019.

Proven by our notable achievements for past 35 years,
Research & Research will continue our journey to be a leading poll firm in Korean survey industry.

WAPOR 77th and WAPOR Asia Pacific 7th Joint Annual Conference
28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

Voice of the People.

University of Michigan Survey Research Center (SRC)

Who can use our services?

Anyone! Scientists, researchers, federal agencies, non-profits, and more.

What research services do we offer?

- general methodological and statistical consultation, including cross-cultural/international considerations and capacity building
- sample design
- weighting and imputation
- questionnaire design
- project management
- interviewer training
- data collection
- data processing
- analysis

If Liberty reminds us of all people's right to be heard, and Quality urges all of us to adopt the highest standards when serving the people, then Humanity must have provided us with the ultimate purpose for upholding Liberty and Quality. In this Keynote Roundtable moderated by WAPOR President Robert Chung, the challenges of IT and AI on public opinion research will be examined by Lee Eun-Ju, the Immediate Past President of ICA, while Colin Irwin from University of Liverpool will share his views on how public opinion research can mitigate humankind conflicts. Christof Wolf, President of GESIS, will explain the relevance of data collection and archiving to humanity, while Daniel Wetzel, who has staged "100% City" in more than 25 cities, will explain how stage performance and public opinion statistics can be connected.</p>

WAPOR Latin America is the regional chapter of the World Association for Public Opinion Research. Established in 2007, the chapter has successfully organized ten international conferences, typically attracting a diverse assembly of approximately 150-180 participants. Attendees come from academic and professional backgrounds, such as private opinion research agencies, political consulting firms, electoral polling organizations, and journalism.

WAPOR Latam publishes RLOP - Revista Latinoamericana de Opinión Pública, which is freely granted to members along with its quarterly newsletter with relevant news for our profession and association. The chapter has been running key webinars on a diversity of relevant topics from Effects of AI on public opinion research, to Challenges of regional survey projects, Threats of fake polls and poor surveying, and Data-driven effective communication on climate change. Online debates on the performance of electoral polls in national elections have also been frequent.

Benefits of being a member of WAPOR Latin America:

- Free subscription to RLOP - Latin American Public Opinion Review.
- Opportunity to expand the reach of research through journalistic notes in Latinoamérica21 and its network of allied media.
- Discount on WAPOR Latam conferences.
- Discount to access the public opinion survey database of The Roper Center, iPoll (free for donating study partners).
- 30% discount for summer and winter programs at the RECSM Methods School of Pompeu Fabra University in Barcelona.
- Discounts of 5% to 15% on courses offered by MRII – Market Research Institute International, in collaboration with the University of Georgia, USA.
- 25% discount to participate in courses on the QUALITATIVA platform.
- 25% discount for the Environmental Public Opinion course offered by the University of Montevideo.
- 20% discount for the Latin American Postgraduate Diploma in Surveys and Public Opinion offered by the Universidad Mayor (Chile).

From April 28th to 30th, 2025, the XI Congress of WAPOR Latin America will be held in the city-island of Florianópolis, Brazil, focusing on the conference themes of "Public opinion, civicism, and global risks in Latin America." The congress will be onsite only and will take place at the premises of UFSC (Universidade Federal de Santa Catarina). It will feature three renowned keynote speakers, with no less than four free workshops aimed at both professionals and academic participants. An expected turnout of 250 attendees is anticipated to exchange knowledge, expertise, and innovations in the industry.

Nov.21 Fri—23 Sun: at Rikkyo University, Tokyo

Theme: Let's Discuss Opinion Polls: Learning From Diversity

WAPOR ORGANIZATIONAL MEMBERS IN 2024

28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

NOTES

This image shows a full page of a document template designed for writing. It features a series of evenly spaced, horizontal black lines across the entire width of the page. The lines are thin and consistent in thickness, providing a guide for letter height. There are no margins, headers, footers, or other markings present on the page.

28-31 July 2024 – Sungkyunkwan University, Seoul, Republic of Korea

NOTES

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal black lines running across the width of the page. The lines are thin and consistent in thickness. There are no margins, text, or other markings on the paper.
